

**To Whom It May Concern,**

I have had a pleasure of teaching and supervising **Mr Jarkko Aho** (born January 19<sup>nd</sup> 1991). Jarkko has proven to be able to understand difficult technical problems and provide excellent technical solutions. Jarkko has worked in several embedded development projects in Metropolia and he has always been pleasure to work with. Especially Jarkko is very fast embedded developer and is able to develop first prototypes quickly.

Jarkko has good attitude and motivation to learn more about his profession.

I have no hesitation in warmly recommending him for employment. If you have any questions regarding this recommendation, please do not hesitate to contact me.

Sincerely,

Kimmo Sauren  
Head of Smart Systems Degree Programme
